IOWA UTILITIES BOARD

RN-2011-0002

STATE OF IOWA

BEFORE THE IOWA UTILITIES BOARD

IN RE:

)

)

MIDAMERICAN ENERGY COMPANY)

DOCKET NO. RN-2011-0002

)

PETITION FOR PRIOR APPROVAL OF CUSTOMER NOTICE

COMES NOW, MidAmerican Energy Company (MidAmerican), and in support of its petition, to the Iowa Utilities Board (Board) for approval of non-standard notices pursuant to 199 IAC 26.5(1)"d"(1), states:

1. MidAmerican is preparing to file a request for approval to implement two adjustment clauses for electric rates pursuant to Iowa Code §476.6 (8).
2. Pursuant to the Board's rules, the Board must grant prior approval of any form of customer notice that does not substantially comply with the standard form set forth in the rules. 199 IAC 26.5(1)"c"; 199 IAC 26.5(1)"d"(1). MidAmerican is not filing for a general increase in its base rates. Those rates will remain unchanged. Rather, MidAmerican is requesting approval to implement two adjustment clauses to recover incremental coal and coal transportation costs and certain environmental compliance costs. Given the nature of MidAmerican's filing, the standard customer notice does not address the implementation of adjustment clauses versus the implementation of a general increase in base rates.
3. MidAmerican's proposed non-standard form contains all of the basic elements of the standard form, except that MidAmerican proposes to inform customers of its request to implement two adjustment clauses and not a general increase in base rates. MidAmerican also proposes

separate letters for each customer class. Separate letters will make the notice easier to follow by offering information outlining specific impacts applicable to the customer's class (i.e. residential, commercial, industrial or street lighting).

4. Additionally, to calculate the proposed increase associated with the two adjustment clauses, MidAmerican proposes to use mean averages computed on the basis of actual average use and average revenue per customer class for MidAmerican's entire system. MidAmerican is applying mean average rather than the median average referenced in IAC 199-26.5(1)"c". Calculating the median average involves time consuming and costly data inputs that are likely to yield information that is no more informative to a customer than the use of the mean average. A mean average will provide customers with a representative increase that is easy to understand. In Docket RN-04-1, the Board found that the "use of mean averages appears to better communicate to most customers the impact of the impending rate case." IUB Docket No. RN-04-1, *Order Approving Customer Notice with Modification*, March 4, 2004. The Board has also approved the use of mean averages for non-standard customer notices for Black Hills in Dockets RN-10-0005, RN-08-03 and RN-05-02 and Interstate Power and Light Company in Dockets RN-04-1, RN 2009-0003, and RN-2010-001.

5. To calculate the mean average, MidAmerican will apply the proposed adjustment clauses to the average use per customer by class and divided by 11 months for 2012 impacts and 12 months for 2013 impacts in order to quantify the average monthly increase per customer in dollars. The average impact per year is then divided by average revenue per customer by class for MidAmerican's entire system to calculate the average percentage increase per customer by class. MidAmerican notes that its customer notices for commercial, industrial, and lighting customer classes will only depict an average percentage increase since the average monthly dollar increase for each customer may vary significantly. Showing the average increase in a percentage for these

customer classes is more meaningful for the customer to determine the increase based on individual usage.

6. MidAmerican's non-standard customer notice allows the customer to obtain a written explanation of all current and proposed rate schedules without charge by visiting a customer office, going on line, or calling MidAmerican customer service.

7. Although MidAmerican's non-standard customer notice form differs in other minor respects from the standard form, the non-standard form is in substantial compliance with the standard form except as otherwise indicated in paragraphs 3-6 *supra*.

8. MidAmerican's non-standard customer notice form complies with 199 IAC 26.5(1)"d"(3), which requires that, at a minimum, all of the information contained in the standard form be included in a non-standard notice. Additionally, for information purposes, MidAmerican has included the customer brochures that it will send along with the Board approved non-standard customer notice. While MidAmerican is not seeking specific approval of the customer brochures, MidAmerican is including the brochure so the Board is aware of the additional information provided with the customer notice.

9. If the Board is of the opinion that waiver of any Board rules is necessary in order to approve the attached non-standard customer notice form, MidAmerican respectfully requests waiver of any such rules on the Board's own motion as provided in 199 IAC 1.3.

10. MidAmerican anticipates filing its request to implement two adjustment clauses for electric rates in mid-December. Since MidAmerican is proposing class-specific notices, MidAmerican anticipates that the lead time from printing and processing will be longer than in previous filings. Therefore, MidAmerican respectfully requests expedited treatment of its request for a non-standard customer notice.

WHEREFORE, MidAmerican Energy Company respectfully requests that the Iowa Utilities Board issue an order approving the attached non-standard customer notice form.

Dated November 8, 2011.

Notice of proposed rate increase

<<NAME>>
 <<ADDRESS>>
 <<ADDRESS>>
 <<ADDRESS>>
 <<CITY, STATE ZIP>>

MidAmerican Energy Company understands that you depend on us to provide safe, reliable electricity at an affordable cost, and we constantly strive to increase efficiency and implement improvements to maintain the reliability of our service, while keeping your costs low. As a result, our Iowa base electric rates have remained stable since 1995, even though the costs to produce electricity have increased.

MidAmerican Energy is asking the Iowa Utilities Board for permission to add two automatic adjustment clauses to its Iowa customers' bills to help cover the increasing costs of environmental compliance and energy production. The proposed clauses would increase total annual revenue by no more than <<\$X>> million in 2012, and no more than <<\$X>> million in 2013. The total cost to Iowa customers during 2012 and 2013 would be no more than <<\$X>> million.

If the proposal is approved, customers will see a two-tiered increase. Although the exact dollar amount will vary depending on a customer's electric usage levels, the approximate average monthly increase for a residential customer in 2012 and 2013 would be as follows:

2011 Average Monthly Charge		Proposed Increase		2012 Proposed Average Monthly Charge	Percent Increase
<<\$X>>	+	<<\$X>>	=	<<\$X>>	<<X%>>
2012 Average Monthly Charge		Proposed Increase		2013 Proposed Average Monthly Charge	Percent Increase
<<\$X>>	+	<<\$X>>	=	<<\$X>>	<<X%>>

If you have a street or security light contract with MidAmerican Energy, the lighting portion of your bill will increase an average of approximately <<X>> percent effective February 2012, and approximately <<X>> percent more, effective January 2013.

Electricity is used every day, and it's easy to take for granted. While the costs of producing electricity are rising across the country, it remains an undeniable value.

ENERGY EFFICIENCY TIPS

SEAL IT UP

Use weather stripping and caulk to seal air leaks and block drafts, even in the basement and attic, around doors, windows, chimneys, electrical outlets and other potential areas for air leakage.

ROLL IT OUT

Make sure your home has adequate insulation. This includes the attic, exterior walls, floors, basement and crawl spaces. In unheated areas, be sure to insulate around furnace ducts or boiler pipes.

SET IT SMART

Keep your thermostat at 68 degrees or lower in the winter and 78 degrees or higher in the summer to save some green. You also can save with a programmable thermostat that automatically adjusts the temperature when you're asleep or away.

BUY IT RIGHT

Install ENERGY STAR® compact fluorescent light bulbs and appliances in your home. ENERGY STAR light bulbs use 75 percent less energy and last up to 10 times longer than standard incandescent bulbs.

WRAP IT UP

Put clear plastic sheets over the inside or outside of your windows to reduce heat loss and increase comfort. Window wrap kits, available at your hardware or home store, are an ideal choice for the job.

KEEP IT CLEAR

Make sure your air registers and radiators aren't being blocked by furniture, rugs, drapes or other objects in your home. In addition, be sure to dust or vacuum registers or radiators on a regular basis.

KEEP IT UP

Have your heating system serviced once a year so it runs properly and efficiently. Change your furnace filters regularly since dirty filters make the system work harder and use more energy than necessary.

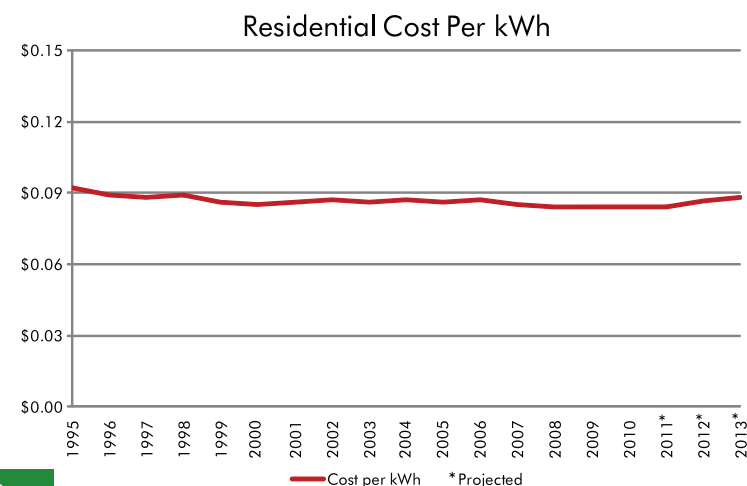

**PROPOSED
IOWA RESIDENTIAL
ELECTRIC RATES**

HISTORY OF MIDAMERICAN ENERGY IOWA RESIDENTIAL ELECTRIC RATES

MidAmerican Energy Company understands that you depend on us to provide safe, reliable and affordable electricity, and we constantly strive to increase efficiency and implement improvements that maintain the reliability of our service while keeping your costs low. **AS A RESULT, OUR IOWA BASE ELECTRIC RATES HAVE REMAINED STABLE SINCE 1995, MORE THAN 16 YEARS.**

COST RECOVERY

MidAmerican Energy's rate stability has allowed for long-term planning with known electricity costs, while providing economic development benefit to communities.

Increasing costs have simply outpaced our ability to maintain current rates. To help cover the increased costs of environmental compliance and energy production from coal, MidAmerican Energy is asking the Iowa Utilities Board for permission to add two automatic adjustment clauses to its Iowa customers' bills, effective February 2012.

ENVIRONMENTAL COST ADJUSTMENT CLAUSE

– MidAmerican Energy has made environmental upgrades to its electric generating stations to reduce emissions. By the end of 2010, environmental compliance costs exceeded \$425 million. This automatic adjustment clause will help cover the depreciation, operation and maintenance of environmental upgrades designed to reduce emissions.

FUEL ADJUSTMENT CLAUSE – MidAmerican Energy customers have benefitted from a long-term coal transportation contract entered into nearly 10 years ago. A significant increase in energy production costs are expected when the contract ends in 2012. Additionally, the cost of coal is higher now than in 1995. This automatic adjustment clause will help cover increased cost of energy production.

HOW CAN I OFFSET THE COST?

Take advantage of MidAmerican Energy's energy efficiency programs to make your home more energy efficient and save money.

SCHEDULE A FREE HOMECHECK® ENERGY AUDIT

An energy auditor will visit your home to install free energy-saving measures and advise if you qualify for insulation rebates. Call **800-545-0762** to see if your home qualifies or complete an online audit at www.midamericanenergy.com/homeaudit.

RESIDENTIAL EQUIPMENT REBATES

MidAmerican Energy customers in Iowa may qualify for rebates for newly installed energy-efficient equipment:

- Natural gas furnaces, boilers or water heaters
- Air-to-air, add-on or ground-source heat pumps
- Central or window air conditioners
- Electric water heaters
- Appliances

For qualifications, call **800-894-9599** or visit www.midamericanenergy.com/ee.

HOW CAN MIDAMERICAN ENERGY HELP ME MANAGE MY BILL?

**PROPOSED
IOWA COMMERCIAL
ELECTRIC RATES**

HISTORY OF MIDAMERICAN ENERGY IOWA COMMERCIAL ELECTRIC RATES

MidAmerican Energy Company understands that you depend on us to provide safe, reliable and affordable electricity, and we constantly strive to increase efficiency and implement improvements that maintain the reliability of our service while keeping your costs low. **AS A RESULT, OUR IOWA BASE ELECTRIC RATES HAVE REMAINED STABLE SINCE 1995, MORE THAN 16 YEARS.**

COST RECOVERY

MidAmerican Energy's rate stability has allowed for long-term planning with known electricity costs, while providing economic development benefit to communities. As an example, MidAmerican Energy added significant wind resources, making Iowa a leader in renewable energy while improving our ability to deal with increased regulation of coal generation. MidAmerican Energy was also able to depreciate generation assets for several years before being included in rates.

To help cover the increased costs of environmental compliance and energy production from coal, MidAmerican Energy is asking the Iowa Utilities Board for permission to add two automatic adjustment clauses to its Iowa customers' bills, effective February 2012.

ENVIRONMENTAL COST ADJUSTMENT CLAUSE

– MidAmerican Energy has made environmental upgrades to its electric generating stations to reduce emissions. By the end of 2010, environmental compliance costs had exceeded \$425 million. This automatic adjustment clause will help cover the depreciation, operation and maintenance of environmental upgrades designed to reduce emissions.

FUEL ADJUSTMENT CLAUSE – MidAmerican Energy customers have benefitted from a long-term coal transportation contract entered into nearly 10 years ago. A significant increase in energy production costs are expected when the contract ends in 2012. Additionally, the cost of coal is higher now than in 1995. This automatic adjustment clause will help cover increased cost of energy production.

HOW CAN I OFFSET THE COST?

Take advantage of MidAmerican Energy's energy efficiency programs to make your business more energy efficient and save money.

SCHEDULE A FREE BUSINESSCHECK® ENERGY AUDIT

An energy auditor will evaluate your business' energy use and provide specific recommendations on how to use energy more efficiently and reduce your energy bills. In addition, our energy specialist may install energy efficiency measures, such as a refrigerated vending machine controller, faucet aerators and/or LED exit sign retrofits. Call **877-401-4059** for details or complete an online audit at www.midamericanenergy.com/busaudit.

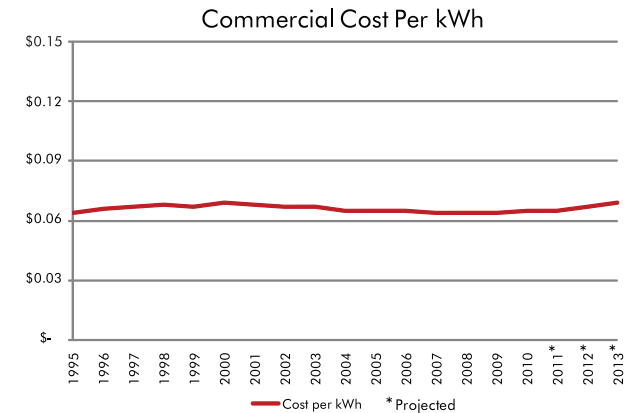

NONRESIDENTIAL EQUIPMENT REBATES

MidAmerican Energy customers in Iowa may qualify for rebates for newly installed energy-efficient equipment:

- Air conditioners (central and room)
- Chillers
- Heat pumps, including geothermal
- Natural gas boilers, furnaces and water heaters

For qualifications, call **800-894-9599** or visit www.midamericanenergy.com/ee.

(Over)

Over the last 16 years, MidAmerican Energy Company has diligently pursued cost reductions and operational efficiencies to keep costs low and stable for customers. Rate stability has allowed for long-term planning with known electricity costs, while providing significant economic development benefit to communities. MidAmerican Energy has:

- Added significant wind resources, making Iowa a leader in renewable energy while improving MidAmerican Energy's ability to deal with increased regulation of coal generation.
- Reduced a \$742 million investment in Walter Scott, Jr. Energy Center Unit 4 by \$304 million from accelerated depreciation through revenue sharing.
- Depreciated generation assets for several years before being included in rates.

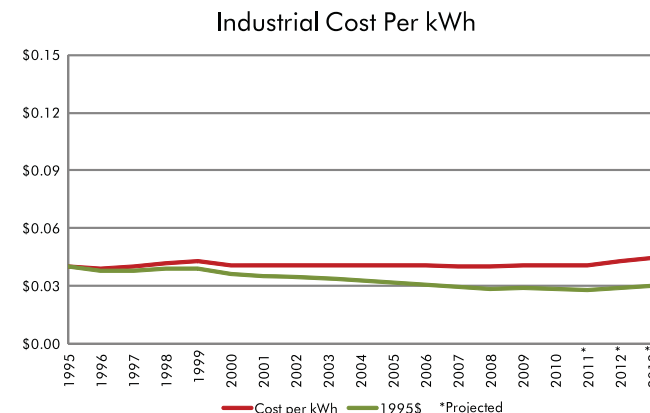

PROPOSED IOWA INDUSTRIAL ELECTRIC RATES

HISTORY OF MIDAMERICAN ENERGY IOWA INDUSTRIAL ELECTRIC RATES

MidAmerican Energy Company understands that you depend on us to provide safe, reliable and affordable electricity, and we constantly strive to increase efficiency and implement improvements that maintain the reliability of our service while keeping your costs low. **AS A RESULT, OUR IOWA BASE ELECTRIC RATES HAVE REMAINED STABLE SINCE 1995, MORE THAN 16 YEARS.**
